

MORITA academy Webinar

THE IMPORTANCE OF DIGITAL VOLUME TOMOGRAPHY IN IMPLANT SURGERY
with Prof. em. Dr. Daniel Buser

Date: Wednesday, 20th March 2024

Time: 19:00 – 20:15 Central European Time (CET)

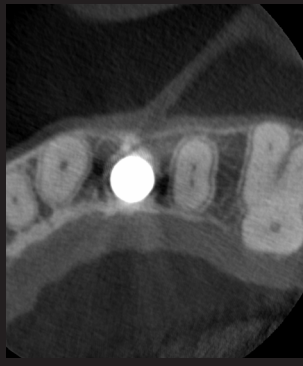

Content of the international webinar

The Dental Volume Tomography (DVT) has been known to be one of the most advanced methods of X-ray diagnostics. Delivering 3D images with utmost precision, it has been indispensable for numerous dental treatments.

Especially in top-level implant surgery it has led to significant progress, as usually, the selection criteria for the best surgical treatment method are only available thanks to the preoperative DVT examination.

Learnings

- > How to interpret preoperative diagnostics and how the DVT delivers the basis for the choice of the best surgical treatment.
- > Relevant state-of-the-art surgical implant techniques, e. g. implantation protocols, the GBR-technique, or the sinus floor elevation.

About the speaker

Prof. em. Dr. Daniel Buser (Bern/Switzerland) is one of the most experienced international implant surgeons with 35 years of surgical experience. He widely lectures at national and international conferences. Also, he used to be a Professor of Oral Surgery at the University of Bern/Switzerland as well as the President of various academic associations including the EAO and the ITI.
